

EXTENSION OF COMPLIANCE PERIOD

I'm uploading my Statutory Declaration for Part 1, and I see a new section called the Compliance Period Verification - what is this?

The deadline for Part 1 was midnight, 29 March 2019. If you are still completing Part 1 after this date, you will be asked to confirm if the QBCC approved an extension of the compliance period, to allow you more time to complete Part 1 without penalty. Applications for extensions for Part 1 have closed.

The QBCC has not granted an extension, what do I do now?

If you have not been granted an extension, (either you applied for it and it was rejected, or you never applied for one) you will still be required to complete Part 1 and will automatically need to continue to Part 2, regardless of your answers to Part 1.

The QBCC has approved my extension, what do I do now?

If the QBCC has approved an extension of the compliance period for your building, you will have a letter from the QBCC to confirm this.

In the Compliance Period Verification section, enter the following details as per the letter sent to you:

- the **new compliance period end date** (dd/mm/yyyy)
- the **Case Number** provided on the letter

After completing this step, Part 1 is complete.

The extension to Part 1 does not impact whether or not the building is required to complete Parts 2 and 3 of the checklist.

Where can I find more information about an extension of time?

The [Guideline for assessing buildings with combustible cladding](#) (available on the Resources page of the Safer Buildings website) has more information under section 8.3.2 Extensions of time.
